SYNERGY2 SERIES

SCUBAPRO

**FEELS LIKE NOTHING.
FITS LIKE NOTHING ELSE.**

TRUFIT TECHNOLOGY

This revolutionary skirt design forms a watertight seal on virtually any face, allowing divers to have a secure mask without sacrificing comfort. Trufit skirts are designed with the highest quality silicone and are identifiable by their unique ribbing texture.

Synergy2: new generation design features two separate silicone skirts. The main skirt is thin and soft to provide the best possible fit, seal and comfort. The outer skirt is thick to provide support and rigidity near the mask frame.

Synergy: original design features one skirt with two thicknesses of silicone. The skirt is thicker near the frame and thinner near the face for great fit, seal and comfort.

SYNERGY SERIES DETAILS
